

		<p>Day the guidelines on the conduct of Mangrove Assessment were presented. On the Second day the guidelines on Seagrass and the last day the guidelines on Corals and Fish Visual Census assessment were presented. After these orientation the following are the next steps to be conducted:</p> <ol style="list-style-type: none"> 1. Inclusion of adjusted cost estimates for the conduct of BAMS in the revised guidelines 2. Another round of consultation to be conducted after revising the draft based on the comments from this activity 3. Harmonization of BAMS to avoid duplication, especially that almost the same information may be collected during photo transect and transect swim 4. Include in the regional work program the capacity building needs of the field implementers in conducting BAMS.
